

GH-PB-XKT High Purity Microporous Pseudo Boehmite

This Pseudo Boehmite has very high purity which has been same with international famous products. This PB has been widely used on advanced hydrotreating alumina catalyst carrier, environmental protection additives etc.

Specification	Result
Pore Volume	0.45-0.55ml/g
Surface Area	>200 m ² /g
Pore size	<14nm
Dispersibility	≥98%
Si	<80ppm
Ca	<80ppm
Na	<80ppm
